

## SERIES D<sub>a</sub> INDEXES

### DIVIDEND PAYMENTS

The purpose of these indexes is to show fluctuations in dividend income. For any given year, the number here presented is the product of the corresponding item in Series Y<sub>a</sub> and the average for the year in question of Series P. It represents at any specified time the rate of income in dollars which would be derived from an investment in dollars equivalent to the annual average of the Series P index. For comparison with earnings, in order to include the same list of stocks as Series E, it would be necessary to use a Series D<sub>Ea</sub>, which could be computed by multiplying Series P<sub>Ea</sub> and Y<sub>Ea</sub> given in Appendixes III and IV.
