

INDEX*

- Activity analysis, 4, 417-420
- Adams, N. R., 72
- Agricultural spatial equilibrium model, 215-233
- aggregation of regions, 227-229
- Fox-Taeuber model, 220-224
- larger models, 224-227
- linear programming formulations, 229-231
- one-commodity model, 217-220
- transportation model used, 219-221, 225
- Agriculture, U. S., Census of, 183
- Agriculture, U. S. Department of, 183, 186
- Alford, L. P., 348, 351
- American Machinist*, 264, 266, 267, 284, 288, 289, 312, 333, 344, 351, 393
- Ammonia-fertilizer model, 136-158
- alternate solutions, 153-155
- assumptions and simplifications of, 144-146
- cost coefficients and market requirements, 150
- cost estimates, 146-148
- enumerative solution, 151-152
- expansion of market sizes, 155-156
- location of plants, 139-141
- location studies, previous, 139-141
- problem defined, 143-144
- process description for, 138
- programming formulation, 148-151
- scale, returns to, in chemical industry, 136-141
- two-site example, 141-143
- Ara, K., 123, 131
- Arden, D. B., 72
- A.S.T.E., 338, 351
- Babcock, J. M., 215
- Bailey, D. R., 239, 263
- Banco de Mexico, 380, 389, 399
- Bangs, J. R., 348, 351
- Barnes, R. M., 341, 351
- Baumol, W. J., 217, 232
