- Aitchison, J., 18, 24, 173
Anderson, T. W., 18, 173
Ando, A., 143*n*, 173
A priori information, 1-3, 4; testing of, 2-3; exact, 2-3, 17-42, 155-56; inexact, 2-3, 43-58, 156; value of, 5, 19, 94-115, 161-62; usefulness of, 41-42, 98; subjective, 49, 137-44; in simultaneous equations model, 59-63; unrealistic expression in classical model, 132-33. *See also* Constraints; Restrictions
Assumptions in classical approach, 6-7
Asymptotic approximation: validity of, 41-42, 58, 132
Asymptotic Cramér-Rao inequality, 11-13, 64, 99; with constraint equations, 23-25; with constraint parameters, 34; with previous sample, 46-47; with inequality constraints, 50; with structural restrictions, 72-73, 79-86, 100-03, 106-15
Asymptotic efficiency, 9-10; under various constraints, 24, 34, 41, 47, 68*n*, 79-82, 95. *See also* Efficiency
Asymptotic estimation theory: pitfalls in, 10*n*
- Bancroft, T. A., 3*n*, 173
Basmann, R. L., 24*n*, 78, 82*n*, 173
Bayesian approach to inference, 2-3, 4-5, 43, 132-68; practicality of, 153, 168
Bayesian structural information, 133-44; value of, 154-68
Bayes's formula, 138, 139, 156, 170
- Cauchy-Schwartz inequality, 12, 20, 22, 170
Chernoff, H., 42, 95, 173
Chetty, V. K., 153, 173
Chiang, C. L., 25, 173
Chipman, J., 25*n*, 173
- Classical approach to inference, 2-3, 4-13, 58, 132-33
Coefficients. *See* Parameters
Coefficient matrices: structural, 59-63, 72
Confidence intervals, 2
Constraint equations, 18-29, 38, 155
Constraint parameters, 29-34, 96-98, 154-55; identification of, 35-38; unidentifiable, 37. *See also* Parameters
Constraints: linear, 18, 23, 24, 33; inequality, 43, 49-58, 132; structural, 59-63, 65-68, 71-72; symmetry, 87-90. *See also* Restrictions
Consumption function model, 76, 144-53
Continuity assumptions, 7, 13, 20
Covariance matrix, 8, 10, 20; asymptotic, 9, 11, 96; in simultaneous equations model, 59-63; singular or nonsingular, 60, 91-93; determinant value of, 94. *See also* Cramér-Rao inequality
Cramér, H., 6, 7, 11, 173
Cramér-Rao inequality, vii, 10, 64; with constraint equations, 19-23; with constraint parameters, 29-32; generalized model for exact constraints, 38-41; with previous sample, 43-46; with inequality constraints, 50; with structural restrictions, 65-86; Bayesian version of, 159-64. *See also* Asymptotic Cramér-Rao inequality
Decision: optimal, 2, 136-39; and estimation, 133
Decision function, 136
Decision rules: restrictions on, 137
Decision theory. *See* Bayesian approach to inference
DeGroot, M. H., 135, 143*n*, 147*n*, 173
Density function, 4, 6-7; prior, subjective, 5, 133, 137-44, 156-64; of previous sample, 17; posterior, 139-40, 156-64. *See also* Distribution

- Distance function, 8, 52-53
- Distribution: discrete, 7; rectangular, 7; truncated, 7; Student, 9, 141, 144, 151; normal, 57, 141-44, 151, 160-61; natural conjugate family, 140-43; gamma, 141; Wishart, 143-44. *See also* Density function
- Drèze, J., 153, 155, 159*n*, 173
- Dugué, D., 6, 11, 173
- Durbin, J., 27-29, 173
- Efficiency, 7-11, 94-95; measure of, 94-95; relative, 96; Bayesian approach to, 156-58. *See also* Asymptotic efficiency
- Efficiency gain: from constraint equations, 19, 21, 23, 24; from constraint parameters, 31-34, 37, 41; from previous sample, 44, 47; from inequality constraints, 50-58; from structural restrictions, 59, 62, 65-72, 81-85; from covariance restriction, 68, 73-78, 81-82, 86; magnitude of, 94-115, 157-58
- Efficiency ratio, 96-98, 101-02, 110
- Error. *See* Mean square error
- Estimability, 158-59
- Estimation, 1-16; optimal point, 2; constrained, 18; mixed, 49; and decision, 133
- Estimation procedures, 1-2; evaluation of, 4-6
- Estimation theory: asymptotic, 10
- Estimator, 4, 7; dispersion of, 5; unbiased, 5; best, 5, 8, 95, 162; efficient, 7-9; consistent, 9; asymptotically efficient, 9-10. *See also* Covariance matrix; Least-squares estimation; Maximum-likelihood estimation; Minimum-chi-square estimation; Minimum-distance estimation; Minimum variance bound estimation
- Expectation operator, 7*n*
- Experiment, 3-4
- Experimental design, 135
- Ferguson, T. S., 25, 174
